

MARKET ENTRY PARTNER FOR CONSTRUCTION INNOVATION

From the Ground Up. For the Planet.

AZ ECO helps U.S. construction innovators validate, enter, and grow in the Israeli construction and infrastructure market.

Who Are Our Partners

Green Material Innovators

Sustainable building materials, bio-based or carbon-negative products, advanced waterproofing and coatings, insulation and thermal performance systems.

Construction Technology Pioneers

Smart building systems and IoT, AI-driven project management, prefab and modular construction, robotics and automation.

Infrastructure Innovators

Structural systems and engineering, safety and compliance technology, heavy infrastructure solutions, and any innovation that builds better.

Raw Material Suppliers

Powder-based raw materials, chemical compounds and admixtures, mineral and composite materials, industrial supply for manufacturing.

Our Added Value

01 ACCESS Direct Market Access

Direct access to the Israeli market and its professional entities: contractors, developers, and decision-makers.

02 CREDIBILITY Backed by Decades

Backed by the AZ Marketing Group: decades of experience, laboratories, standards, delivered projects, and existing infrastructure.

03 EVALUATION Real Compatibility Testing

Not just "finding technologies," but testing real compatibility: performance, regulation, market fit, scalability, and commercial potential.

04 REPRESENTATION More Than Distribution

Not just distributors. Representing and translating the product to the local market, and promoting the right business connections.

THE ISRAEL ADVANTAGE

A fast-moving construction market with real demand for advanced materials, infrastructure solutions, and green building technologies.
